BuddyPhones®

SafeAudio for Kids

The BuddyPhones® Discover is an affordable introduction to safe audio for young kids. Since exposure to excessive volume is damaging to hearing, the Discover has built-in volume-limiting circuitry that automatically caps the sound at 85 decibels, as recommended by the World Health Organization (WHO). The Discover comes with an attached flat cable that reduces tangling and lowers choking risk, and an audio jack that allows four listeners to join in on safe audio. To make safe listening fun for kids, the Discover comes with with a set of stickers designed by a renowned illustrator, so each kid can personalize their own headphones.

The BuddyPhones® Discover are exceptionally durable and bendy so they are less likely to snap if they are sat on, dropped or twisted. They can be fully adjusted to different sizes and feature soft anti allergenic ear cushions for maximum comfort. They also come with four sets of fun, colorful stickers as well as blank ones, allowing kids to get creative and design their own.
