4.Installation

4.1 Mini (PoE) NVR 1000 Series Installation

Step1: Remove the screws at the bottom panel and pull up the casing.

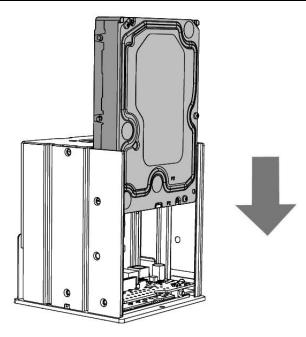

Step2: Insert SATA HDD in the slot as required.

(Mini NVR Series)

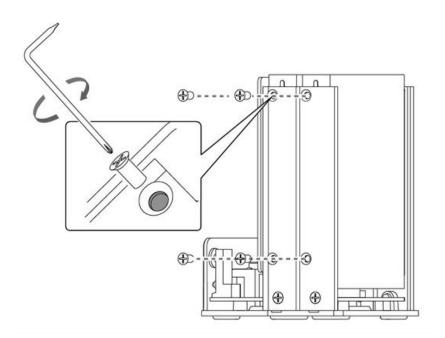

(Mini PoE NVR Series)

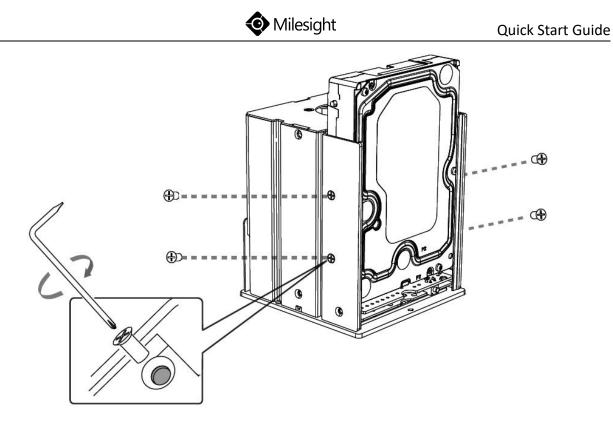

Note: MS-N1009-UT supports two SATA HDD (2.5"), MS-N1009-UNT and Mini

PoE NVR supports one SATA HDD (3.5").

Step3: Secure the HDD with screws.

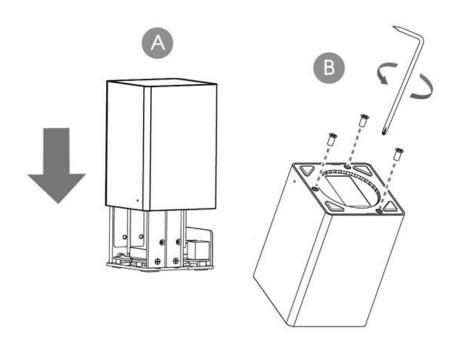

(Mini NVR Series)

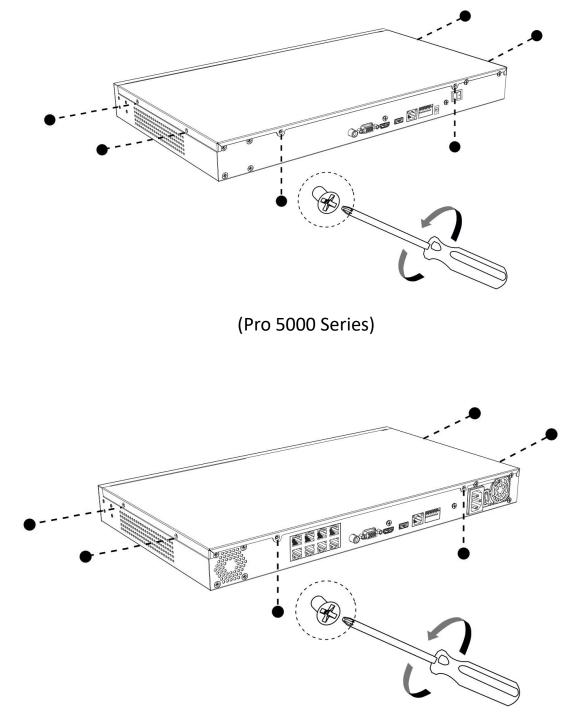

(Mini PoE NVR Series)

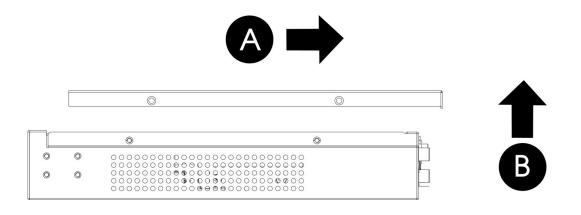

4.2 Pro/PoE NVR 5000 Series Installation

Step1: Using a cross screwdriver to remove the screws at the rear panel in an anticlockwise direction.

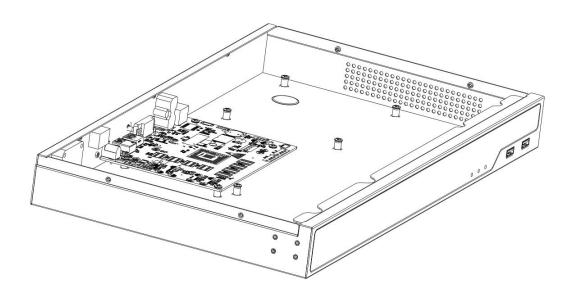

(PoE 5000 Series)

Step2: Slide the upper casing to the right first and lift it up.

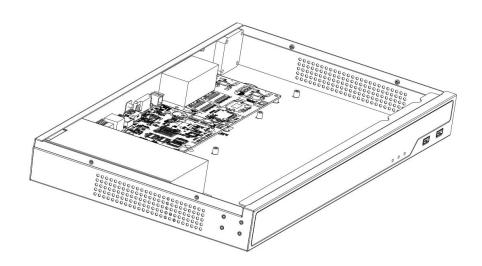

Step3: The internal structure of Pro/PoE 5000 Series is shown as below.

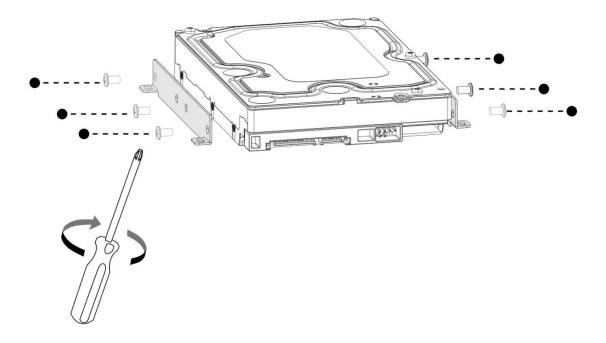

(Pro 5000 Series)

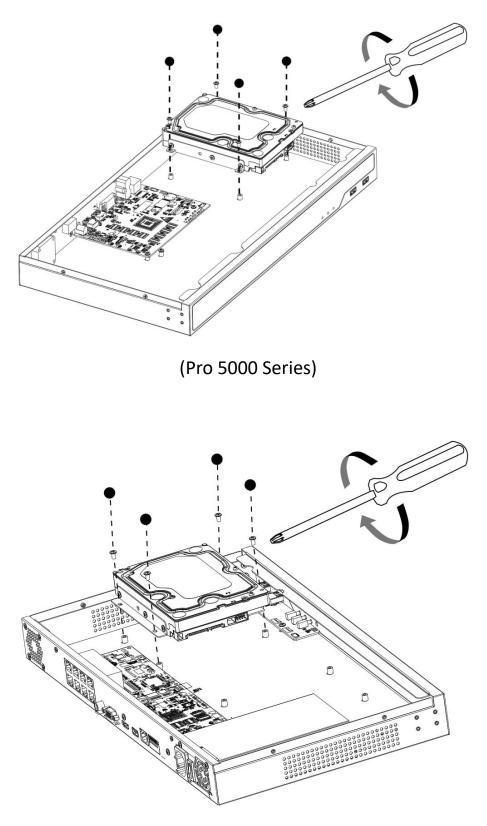

(PoE 5000 Series)

Step4: Hard Disk Installation: Lock the hard disk with the HDD bracket. 6 screws for each hard disk installation.

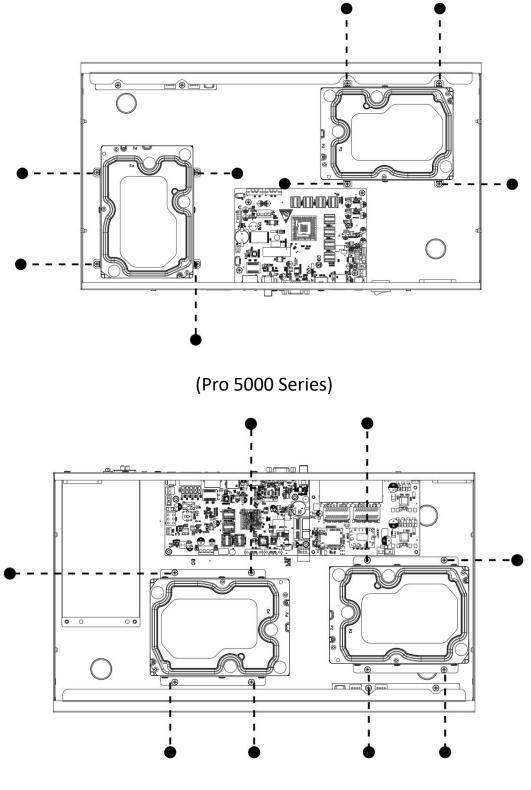

Step5: Secure the HDD brackets with hark disks in the casing. 4 screws for each HDD bracket.

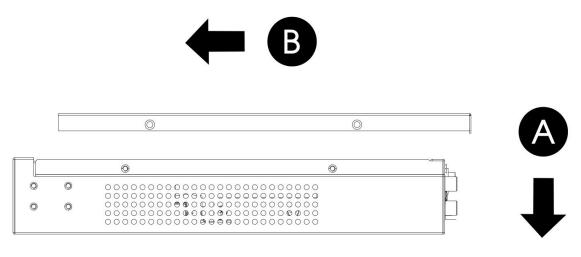

(PoE 5000 Series)

Step6: After that, check if all the screws are tightened. Then connect the power cable and data cable to each HDD.

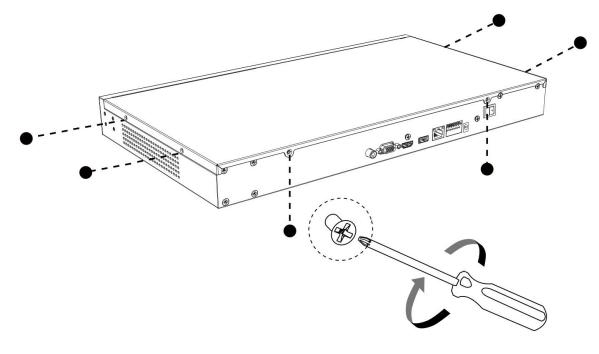

(PoE 5000 Series)

Step7: Pull down the upper casing and slide it to the left.

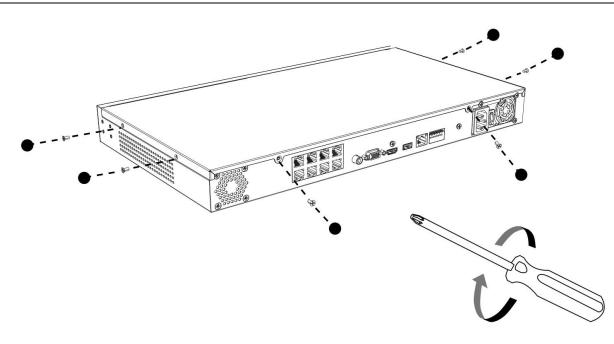

Step8: Retighten the screws on the rear panel.

(Pro 5000 Series)

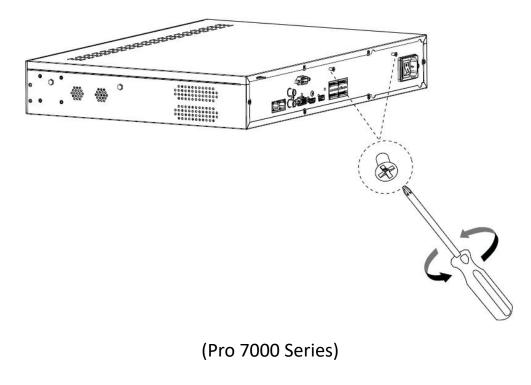

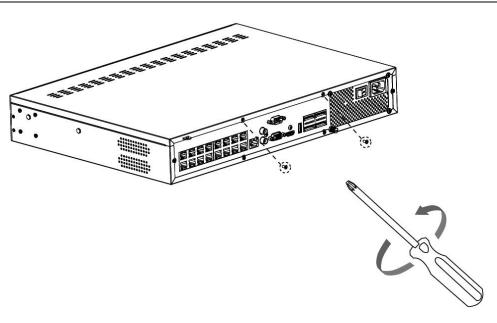

(PoE 5000 Series)

4.3 Pro/PoE NVR 7000 Series Installation

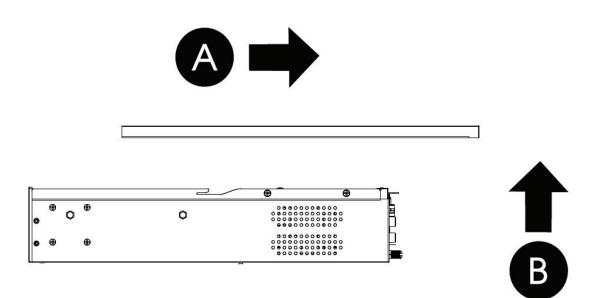

Step1: Using a cross screwdriver to remove the screws at the rear panel in an anticlockwise direction.

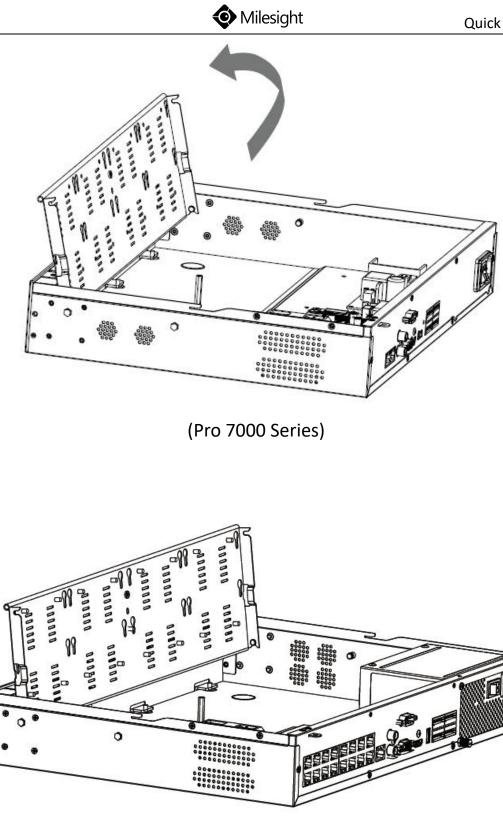

Step2: Slide the upper casing to the right first and lift it up.

Step3: The HDD bracket is rotatable and can be taken down by pulling up and rotating one side of it.

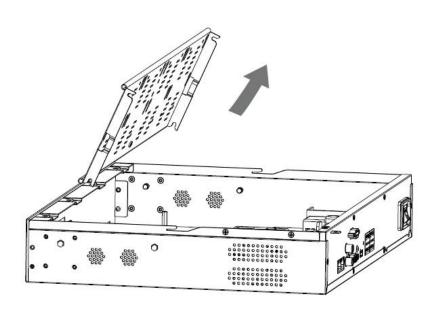

(PoE 7000 Series)

Step4: To install HDD more conveniently, you can:

1) Remove the bracket.

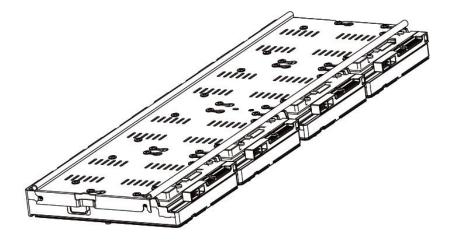

23

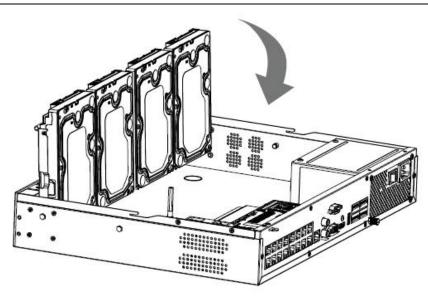

(Pro 7000 Series)

2) Install the HDD on the bracket.

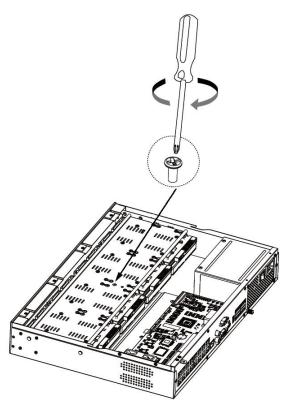

3) After securing the HDD on bracket, insert the bracket back to the NVR.

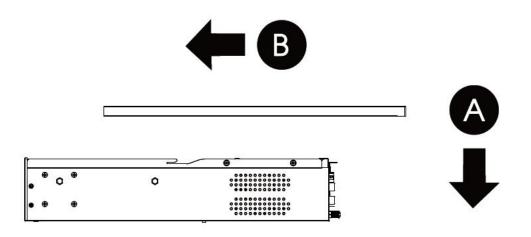

(PoE 7000 Series)

Step5: Check if all the 16 screws in HDD bracket are screwed tightly, if not, screw them tightly in an clockwise direction. And fix the bracket with a screw in the middle of bracket. Then connect the power cable and data cable to each HDD.

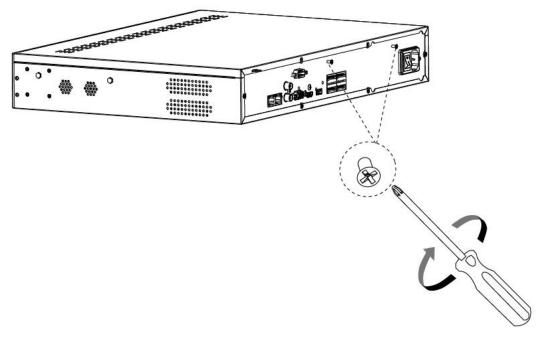

(PoE 7000 Series)

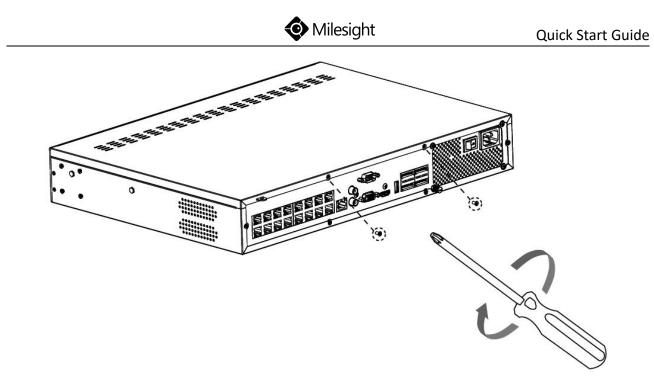

Step6: Pull down the upper casing and slide it to the left.

Step7: Retighten the screws on the rear cover.

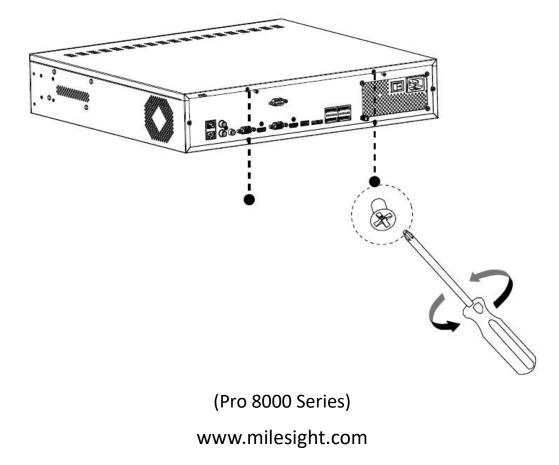

(Pro 7000 Series)

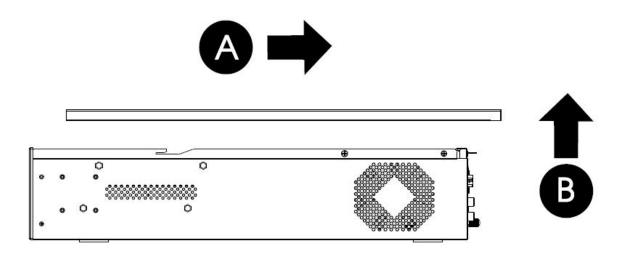

(PoE 7000 Series)

4.4 Pro NVR 8000 Series Installation

Step1: Using a cross screwdriver to remove the screws at the rear panel in an anticlockwise direction.

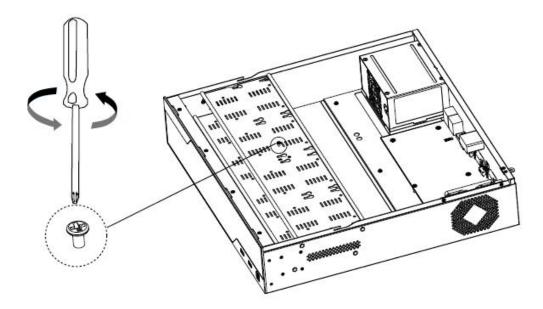

Step2: Slide the upper casing to the right first and lift it up.

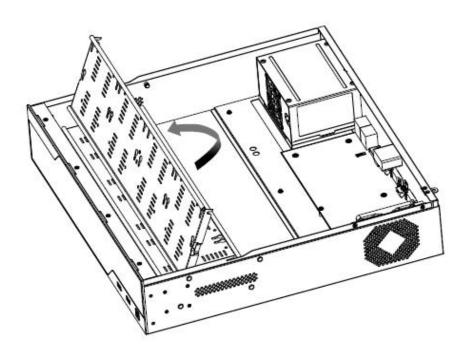

Milesight

Step3: Using the screwdriver to remove the screw in the middle of HDD bracket in an anticlockwise direction (Pro 7000 has only one HDD bracket and Pro 8000 has two, while the installation steps are the same).

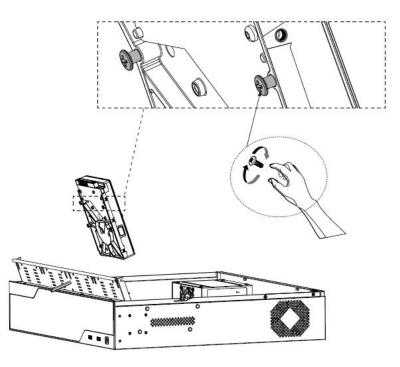

Step4: The HDD bracket is rotatable and can be taken down by pulling up and rotating one side of it.

Step5: Secure the HDD with 4 screws. Don't screw tight and leave about 4mm distance at the side of each screw nut. As the enlarged drawing shows:

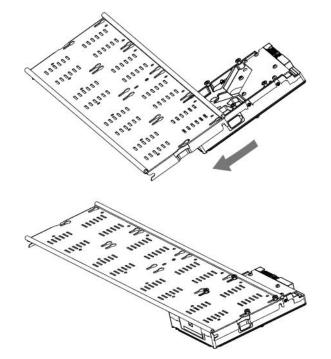

Step6: After securing each HDD with 4 screws, stuck the side with screw nuts in

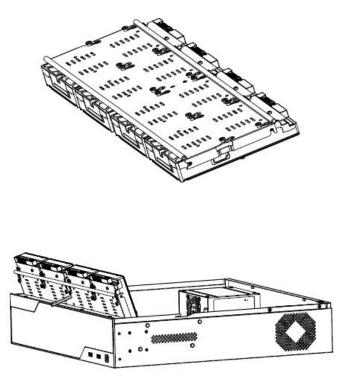

the bracket's slots and then slide down to fix the HDD in the bracket. Screw ²⁹ www.milesight.com

tight with screwdriver.

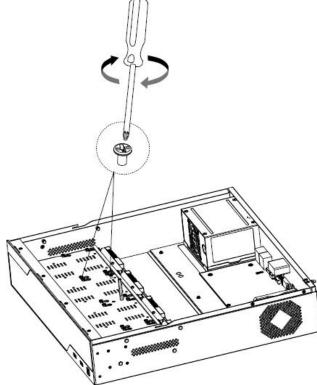

Step7: Repeat the above steps to install HDD in the bracket. Remember to check if you have screwed tight.

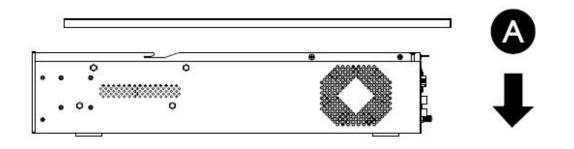

Step8: Secure the 16 screws in HDD and fix the bracket with a screw in the middle of it. Then connect the power cable and data cable to each HDD.

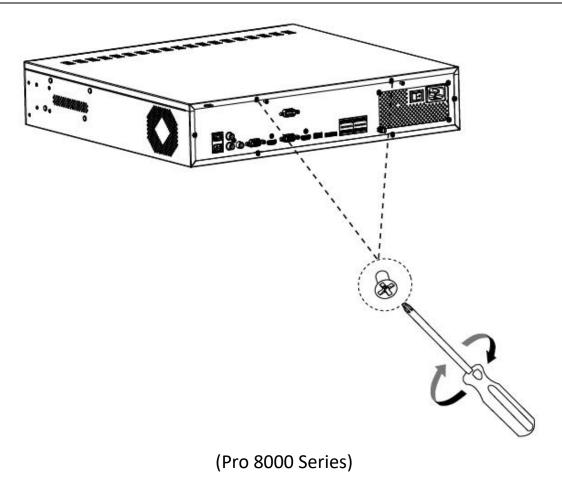

Step9: Pull down the upper casing and slide it to the left.

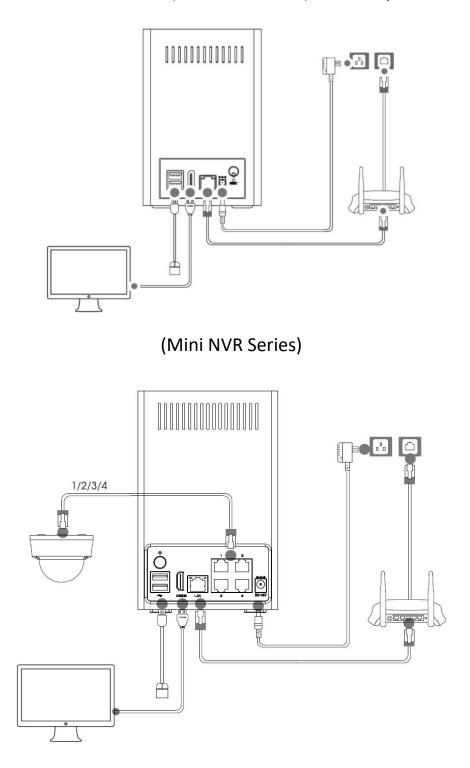

Step10: Retighten the screws on the rear panel.

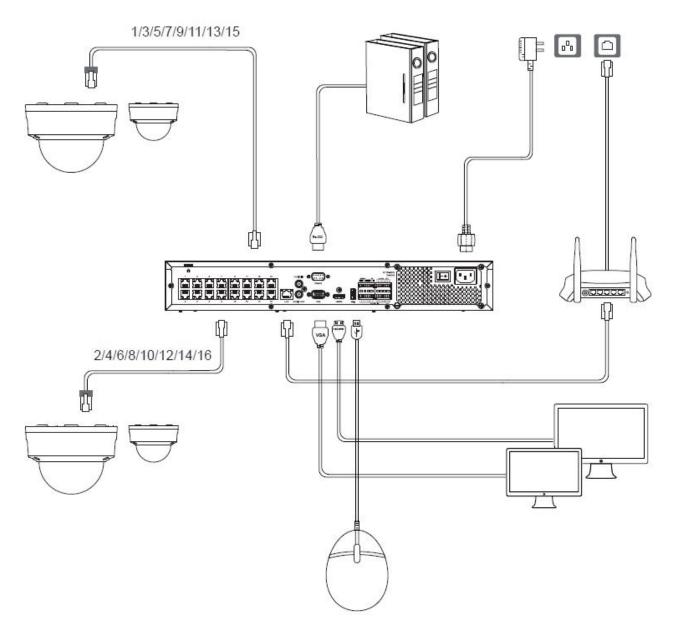

5.Connection Overview

Connect different devices to the interfaces of NVR, taking Mini (PoE) NVR Series and PoE 7000 NVR Series (MS-N7016-UPH) for example:

(Mini PoE NVR Series)

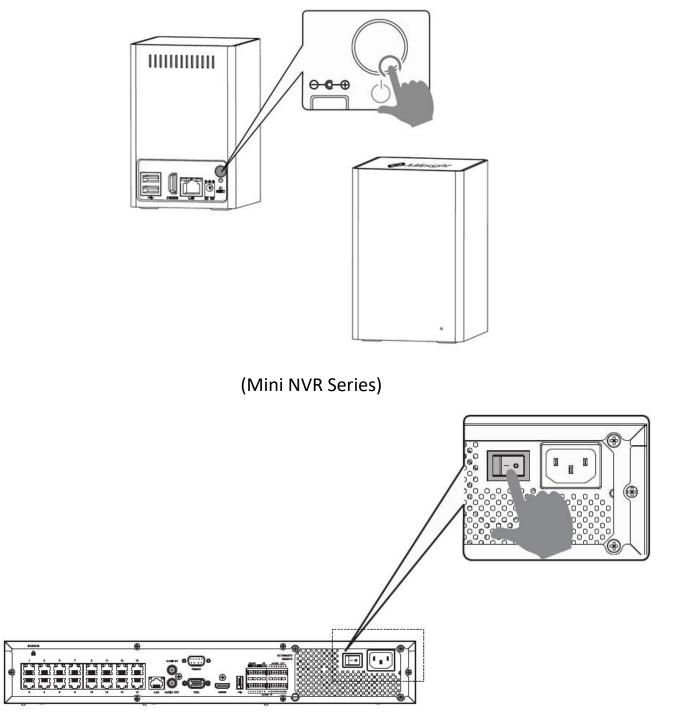

(PoE 7000 Series (MS-N7016-UPH))

6.Ready to Start

Press the power button, the LED Indicator will light steadily when it is connected to a power source, taking Mini NVR Series and PoE 7000 NVR Series (MS-N7016-UPH) for example:

(PoE 7000 Series (MS-N7016-UPH))

www.milesight.com

Note: Milesight 4-CH/8-CH/16-CH/24-CH Plug and Play NVR features 4/8/16/24 independent PoE Ports. The software can automatically detect and configure the network cameras just after being plugged the cable, greatly eliminating the need for much time and expertise, and achieving a virtually hassle-free installation process.

7. Access to NVR

7.1 Search the NVR via Smart Tools

If the IP address of the NVR is unknown, please use the Smart Tools to search the IP address. Smart Tools can automatically detect online Milesight NVRs connected in the LAN. You can get the IP address of the NVR by searching in the Tools.

Click on the NVR Tools button to enter the NVR Tools interface:

0/47 Device Name: Protection Port Port Retmask. Constraints Gateway: Constraints DNS: Const											

The specific steps are as follows:

Step1: Input the MAC address (marked as 1) to search your NVR;

Step2: Click on the area (marked as 2) to list the NVR one by one;

Step3: Click on your NVR in the list (marked as 3), then you can change the

parameters including the IP address, Port, Netmask, Gateway and DNS.

If the selected NVR shows "Active" in the status bar, you can directly type the User Name and Password (NVR with version lower than 7x.9.0.3 is using admin/ms1234 by default), change the IP address or other network values, and then click "Modify" button;

If the selected NVR shows "Inactive" in the status bar(NVR with version V7x.9.0.3 or above), click Control Activate to set the password when using it for the first time. You can also set the security questions when activating the NVR in case that you forget the password(You can reset the password by answering three security questions correctly). Click 'Save' and it will show that the activation was successful.

Note:

- (1) Password must be 8 to 32 characters long, contain at least one number and one letter.
- (2) You need to upgrade Smart Tools version to V2.4.0.1 or above to activate the NVR.

After activation, you can change the IP address or other network values, and then click "Modify" button. (Default IP address of NVR is 192.168.5.200.)

Step4: Click on the Browser button (marked as 4) to access to the web page of the NVR;

You can get more information about Smart Tools from the User Manual.

7.2 Via WEB

7.2.1 Log-in

After the NVR being connected to the Internet, you can access to NVR via WEB by IP address.

If the network segment of the computer and that of the NVR are different, you need to change the IP address of computer to 192.168.5.0 segment, here are two ways as below:

a. Start \rightarrow Control Panel \rightarrow Network and Internet Connection \rightarrow Network

Connection \rightarrow Local Area Connection, and double click it.

eneral				
	automatically if your network support eed to ask your network administrator			
Obtain an IP address auton Obtain an IP address auton Obtain an IP address				
IP address:	192.168.1.10			
Subnet mask:	255.255.255.0			
Default gateway:	192.168.1.1			
 Obtain DNS server address Use the following DNS server Preferred DNS server: Alternate DNS server: 				
Validate settings upon exit	Advanced.			

b. Click "Advanced", and then click "IP settings" → "IP address" → "Add". In the pop-up window, enter an IP address that in the same segment with Milesight network camera (e.g. 192.168.5.61, but please note that this IP address shall not conflict with the IP address on the existing network);

Settings DNS WIN:	S
IP addresses	
IP address	Subnet mask
192.168.1.10	255.255.255.0
P/IP Address	2
P/IP Address	
IP address:	192 . 168 . 5 . 61
	192 . 168 . 5 . 61 255 . 255 . 255 . 0

Step2: Start the browser. In the address bar, enter the default IP address of the

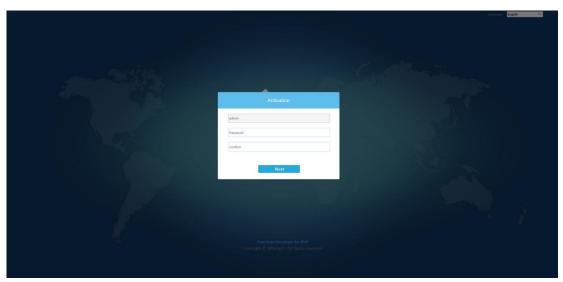

NVR: http://192.168.5.200;

Step3: If the NVR's firmware version is lower than V7x.9.0.3, it will directly display the login page, you can log in the NVR with default user name(admin) and default password(ms1234);

If the NVR's firmware version is V7x.9.0.3 or above, you need to set the password first when using it for the first time. And you can also set three security questions for your device after activation. Then, you can log in the device with You can log in to the NVR with the username(admin) and a custom password.

PoE Ch	annel	Edit S	tatus	IP Addr	ress P	ort	Protocol	MAC Firmv

⑦ Record Setting

Also you can skip the wizard to login directly.

User Login Network Video Recorder	
Uver Name admin V Possword	
Logn	

Then add cameras in Camera interface.

Details are shown as follows:

(1) Camera Management

- 2 Camera Search
- 1. Select IP Range, NIC and Protocol, which includes ALL, ONVIF and MSSP.
- 2. Click search button to search cameras at the same LAN with NVR.
- 3. Select one channel, click Add button, input password and click Add button to finish

4. Check checkbox to batch adding the network cameras if they are with the same password, you can choose TCP or UDP transport protocol for it. Click OK to finish batch adding
