## Lighter. Sharper. Smarter.

We took everything users loved about our original Trio and redesigned it from the ground up. With a sleeker build, improved resolution, and a new single-cable connection, Trio 3 Pro is ready to supercharge your workflow without the bulk.

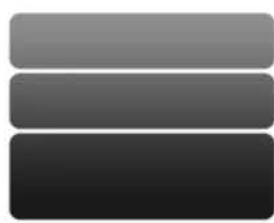

### Lighter & Slimmer Than Ever

Take your multi-screen setup anywhere. Trio 3 Pro is 29% thinner than the previous versions. They are ultra-portable and built to match the look and feel of your modern laptop.

### Single-Cable Setup

Trio 3 Pro connect using just one cable—no adapters or tangle of wires. Compatible with Mac, Windows, and Linux (USB-C DisplayPort Alt required)

### Protective Folio Built-in Kickstand

Features an optional magnetic attachment for quick setup and all-around protection against scratches, bumps, and minor drops. It offers adjustable viewing angles from 45° to 80°, creating a stable, ergonomic workspace wherever you go.
