DUEX Float

Portable Stacked Laptop Monitor

Tired of straining your neck and back while working on the go? Meet our latest innovation: **Mobile Pixels Duex Float, a 15.6-inch 1080p portable touchscreen laptop monitor** that allows you to easily create a stacked dual-screen configuration no matter where you are. If you're someone who needs to juggle multiple tasks at once without covering your desk in extra screens, Duex Float is the answer.

HIGHLIGHTS:

15.6" Full HD Display

10-point multi-touch

Stacked Design

Built-in Kickstand

Auto-rotation

Plug and Play

Be flexible.

The double hinge system gives you the flexibility to choose from three modes, dual-screen mode, presentation mode, and desktop mode.

Dual-screen mode

Use it as your secondary monitor as a extended display or mirrored display. Achieve a healthy ergonomic alignment while working on the go.

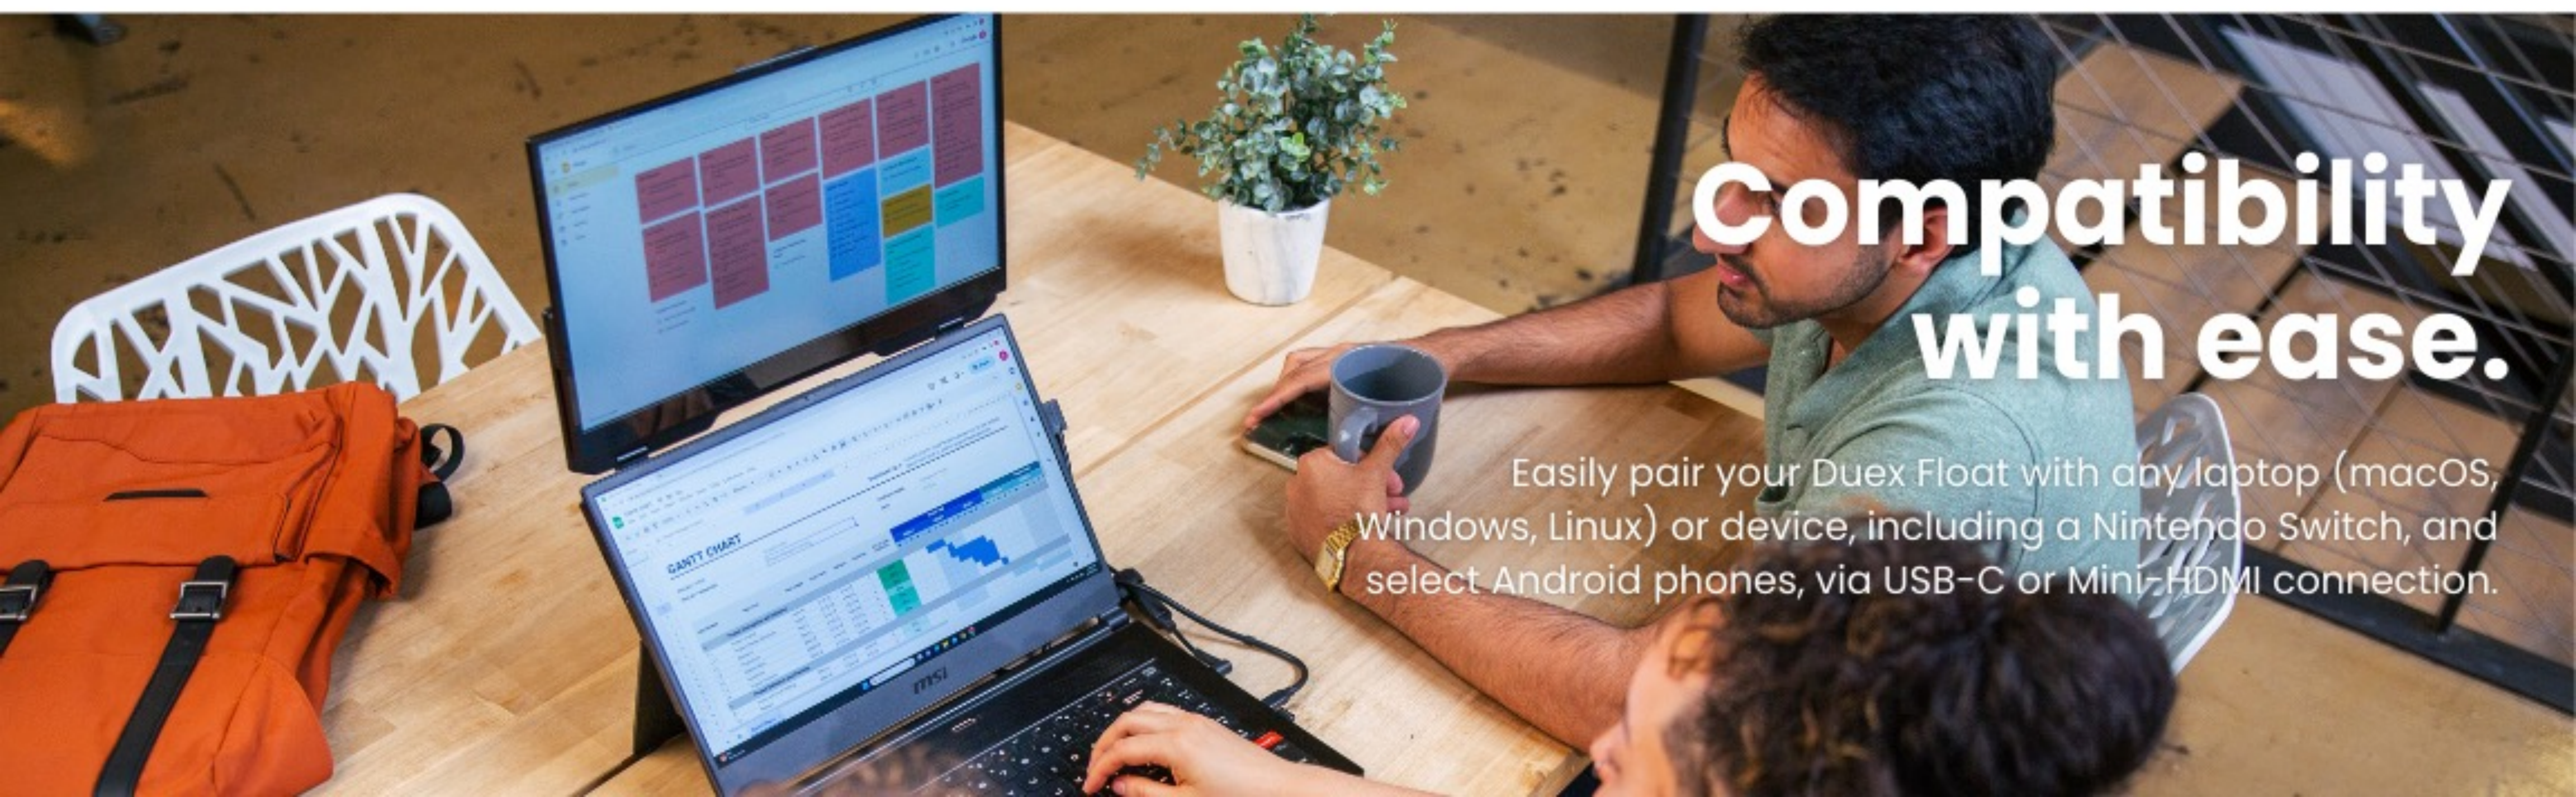

Presentation mode

You can also flip the screen and easily share content with someone in front of you, whether it's a presentation to your team at work.

Desktop mode

Turn Duex Float into an independent touch screen display. Perfect for gaming or viewing documents.

Compatibility with ease.

Easily pair your Duex Float with any laptop (macOS, Windows, Linux) or device, including a Nintendo Switch, and select Android phones, via USB-C or Mini-HDMI connection.
