

# H04 Portable UV Air Purifier

Nanotime Beauty was born in 2004. They employ more than 100 R&D professionals from various countries and research labs in China and Japan, and it has created several international patents and quite a few electronic beauty products that lead the market.

## SAFE & SILENT

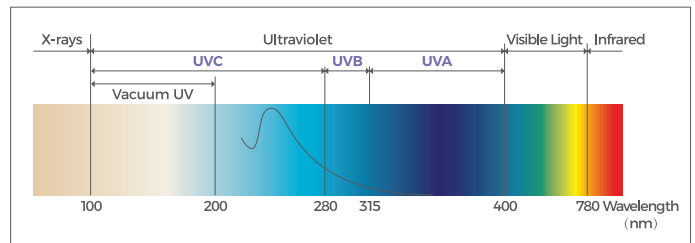

The UVC light is embedded in the product and during use there is no exposure. The product produces no ozone, and therefore can be used even when people are in the same room. Producing barely any noise the product is ideal for dormitories or other rooms.

## SMALL & PORTABLE

The Air Purifier is small, light and does not contain any batteries. The USB version can even be powered from your laptop. Hence it is ideal to move around in the house, or even have it as travel companion.

## UVC TO KILL AIRBORN BACTERIA, VIRUSES AND MOLD

The H04 Air Purifier has been one of their latest products, which purifies the air using UVC light. UVC has been used for removing bacteria, and viruses for the last decades. It is widely used in medical environment with its high disinfection rate.
