Snap Magnetic Wireless Charger

About The Product

For your everyday charging needs, now upgraded to support the latest MagSafe technology. Our Snap Magnetic Wireless Charger is designed to magnetically align with your iPhone 12 for fast and hassle-free wireless charging. Designed with extra long 3m cable fitted with a leather belt for cable management. The Magnetic Charging Pad is designed with an ultra-thin aluminum case, bringing you a nice, elevated feeling while staying ultra-slim.

Why have we created

Snap Magnetic Wireless Charger?

- We have discovered that many iPhone 12 users complain that the 1.2m length of the MagSafe charger is too short for comfortable use
- We want to bring more character and personality to your daily charging needs, keeping it simple but always true to the Native Union style
- With no good option available on the market, we decided to create our own take on the MagSafe cable: Snap

Thoughtfully designed to fit your lifestyle

- Snaps magnetically into place for seamless iPhone 12 wireless charging
- Extra-long 10ft / 3m cable to charge & use your device in comfort
- Nylon braided cable construction for enhanced durability & strength
- Slim & sleek design housed in aluminum with genuine leather belt to stay tangle-free
- Silicone base to prevent desk scratching and slipping
