

DATASHEET

NUKI KEYPAD 2

NFC

One tap. Infinite convenience.

Product Overview

For those who value both simplicity and smart technology, the Nuki Keypad 2 NFC offers effortless door access with just a tap. Whether using Apple home key*, Samsung Digital Home Key, or the Nuki App Mode, your phone becomes your key. Prefer something else? Enter with a code or fingerprint instead — all that housed in a sleek, minimalist design built for privacy, durability, and the future of smart access.

- Built-in NFC for fast and secure access using just a tap of your smartphone. To unlock Apple home key* or Samsung Digital Home Key, a brand-specific Matter-enabled hub and a Nuki Smart Lock of the 4th or 5th generation (Nuki Smart Lock Ultra, Nuki Smart Lock Pro, Nuki Smart Lock Go) are required.
- For users without Matter capability, Tap to Unlock via the Nuki App Mode allows you to still benefit from NFC.
- Store up to 35 Tap to Unlock keys, 20 fingerprints and up to 200 codes.
- Designed in Austria and manufactured in Europe, with a focus on privacy, data security, and state-of-the-art encryption standards.
- Easy self-installation with adhesive tape or screws (no wiring required).

Technical Details

*When paired with a compatible Nuki Smart Lock, Tap to Unlock with Apple home key is available for iPhone XS and later running iOS 18.6 or later and Apple Watch Series 4 and later running watchOS 11.6 or later.
