

ME-90 GUITAR MULTIPLE EFFECTS

EFFORTLESS CREATIVITY AT YOUR FEET

The BOSS ME series has been a favorite of performing guitarists for over three decades, combining multi-effects power with intuitive hands-on control for crafting tones in seconds. The ME-90 is the most advanced ME model to date, offering exceptional audio quality with 24-bit AD/DA and 32-bit floating point processing, flagship-grade AIRD amp models, IR loading, an effects loop, and more. Compact, battery-powered, and filled with premium BOSS tones, this versatile all-in-one processor makes it easy to build customized sound setups for every playing situation.

LATEST PROCESSING TECHNOLOGY

ME-90 features the **latest BOSS audio engine**.

Responsible amp modelling via **A.I.R.D.** technology and a plethora of **new inspiring effect** algorithms, including a brand new **Tune Down** effect.

KNOB-BASED INTERFACE

All the 97 effects and amps are immediately accessible from the panel for instant tone creation without menu-diving.

IMPULSE RESPONSE

There are **3 custom IR slots** for you to load your own mic and cab IR in the unit via its dedicated IR loader.

MEMORY & MANUAL

Manual mode behaves like a regular pedalboard layout while memory mode enables to save effect combinations with intuitive control assignments.

A·I·R·D

CUSTOMIZATION

The last effect of each section is **customisable** via BOSS Tone Studio editor. It also automatically positions each of them in the appropriate order for best sound result.

FLEXIBLE FX LOOP

The **new Send/Return** enables the use of external amps and effects with ME-90. This can be **Pre or Post preamp** section. You can also control the FX loop by foot in Manual mode.

OUTPUT

The output is also optimised for the gear connected to it:

- Guitar Amp
- **Line (this adds Mic/Speaker emulation).**

WIRELESS

With BT-Dual (optional) you can **stream audio** as well as **edit your effects & patches via BOSS Tone Studio** for mobile.

LIGHTWEIGHT & BATTERY POWERED

With **only 2.9kg**, you can play anywhere. With just **4x AA batteries**, ME-90 offers +6hours of performance.

SEND/RETURN CONTROL

In **MANUAL mode**, press **EDIT** multiple times to select parameter [**r0**] or [**r1**]. Then press **WRITE** to save the setting :

- **r0** : CTL/REV Footswitch controls the **Reverb** in Manual Mode.
- **r1** : CTL/REV Footswitch controls the **FX loop** in Manual Mode.

SEND/RETURN POSITION

Press **EDIT** multiple times to select parameter [**50**] or [**51**] :

- **50** : S/R is inserted **before** the preamp.
- **51** : S/R is inserted **after** the preamp.

CARRYOVER

Press edit multiple times to select parameter [**00**] or [**01**]

- **00** : When you switch patches, effect's in the DELAY section is **not** carried over.*
- **01** : When you switch patches, effect's in the DELAY section is carried over (factory setting).*

* THIS DOES NOT APPLY TO THE DELAY FOR EQ/FX2 AND MOD.

IMPULSE RESPONSE

Press & Hold the **EDIT** button, and press the footswitch corresponding to the desired IR :

- **1** : [0] Original speaker simulation tuned to the preamp type selected (factory setting)
- **2** : [1] User 1 IR
- **3** : [2] User 2 IR
- **4** : [3] User 3 IR

CONTROL ASSIGNMENT

Select **Memory Mode**. Press **CTL** button on ME-90. Then press the footswitches corresponding to the effects you want to toggle. Save the Memory to store these settings.

CONTROL BEHAVIOUR

In **Memory Mode**, press **CTL** button twice. With the **BANK UP & DOWN** pedals select: **t0** for Toggle. **M0** for Momentary. Press **EXIT**. Save the Memory to store these settings.

TAP TEMPO

Press & hold the **CURRENT MEMORY / DELAY** footswitch until it blinks, then tap the tempo on it. Press & Hold again to exit Tap Tempo mode.

LOOPER

Make sure the Delay section is on **PHRASE LOOP**. Press & hold the **CURRENT MEMORY / DELAY** footswitch until it double-blinks :

- Press once to **Record**.
- Press again to **Play**.
- Press one more time to **Overdub**.
- Double-press to **Stop**.
- Press & Hold to **Erase**.
