German Concert V-Piano Expansion

The German Concert expansion provides a versatile new voice inspired by famous concert-class grand pianos.

Enhanced modeling features offer advanced sonic possibilities highlighted with 17 ready-to-play Tones. The sound is organic and responsive for solo work while also delivering muscle and presence for cutting through dense band mixes on stage.

Essential Upright V-Piano Expansion

The newly developed Essential Upright expansion introduces an intimate sonic flavor with the distinctive character and unique spatial quality of a high-end upright piano.

The 14 preset Tones include classic sounds for pop and rock styles, along with a variety of colorful non-standard sounds.

Craft Your Personal Sound with Piano Designer

Like other V-Piano sounds, you can use the RD-2000's advanced Piano Designer tools to customize the expansions for your style and touch fully.

When combined with the instrument's powerful sound layering and effect processing options, the creative possibilities are endless.
