SH-4d VERSION 2.0 UPDATE

Free Upgrade for Fresh Inspiration

Creative Momentum

The SH-4d expands its creative potential with Version 2.0, a free update packed with powerful new features and artist-driven enhancements to spark fresh synth-spiration.

More Power, More Flexibility

SH-4d Version 2.0 gives electronic music producers new sonic capabilities with two expressive new OSC Models, pattern chaining for streamlined performances, and serious workflow refinements.

Fresh New Features

Two new OSC Models

STEP for step-based LFO modulation to produce dynamic movement within tones.

From rigid, classic analog step sequencer-inspired phrases locked into the groove, to experimental soundscapes with curves, swells, bleeps and bloops.

HARMONIC for rich, layered sounds with a classic drawbar organ layout.

Prime for creating essential house bass tones, bell-like chimes, deep pads, and powerful organ sounds with hands-on control of four harmonically tuned drawbars.

New OSC Models include **NEW PRESET TONES**.

Refine your Workflow

- **PATTERN CHAIN** for streamlined hands-free performances and song construction, made smoother still with the new SYSTEM-LEVEL FX.
- **SYSTEM-LEVEL FX** options make it possible to have consistent Reverb, Delay, and Chorus settings across all patterns for cohesive mixes in the studio as well as uninterrupted pattern switching while playing live, maintaining effects tails.
- **QUICK OVERWRITE** for saving tone and pattern data with one swift action, minimizing time spent in the menu and preserving creative momentum.
- **UNDO/REDO** function now supported up to 10 times for worry-free experimentation when creating sequences. Keep a happy accident or revert back to your previous state!
- **New SUB-STEP options** allow for off-grid note entry, shifting synth and drum hits behind-the-beat for looser grooves and even greater variations when paired with Probability.
- **Extended MIDI control** with improved program change implementation as well as new options for which MIDI data is transmitted to external devices.

Your customers can update their SH-4d with Version 2.0 now.

Be sure to update your demo stock and product listings.
