# SP-404MKII VERSION 5 UPDATE

The Ultimate SP – Now a Serato Controller Too

## Built to Evolve

The SP-404MKII continues to grow with free powerful updates that unlock new ways to perform, produce, and craft your signature sound. We've packed Version 5 full of new features developed with the SP artist community.

## Serato power

The world's favorite portable sampler continues to expand, bridging seamlessly with the premier software tools in DJ and beat culture. SP-404MKII Version 5 and later brings native support for Serato DJ Lite, Serato DJ Pro,\* and Serato Studio, transforming the hardware into a pre-mapped Serato controller ready for new directions in DJ sets, beatmaking, and song creation. Unleash sonic mayhem by fusing Serato's advanced audio processing with the SP-404MKII interface, blending the magic of Serato Stems technology with iconic SP effects. This dynamic connection blurs the lines between production and DJing, opening up creative possibilities no other setup can match.
