

Introducing Sphero Edu Jr™

Sphero's all new drag and drop programming blocks

Control how indi™ reacts to the world through intuitive yet powerful programming blocks or enhance computational thinking skills by creating new patterns and solving puzzles.

KEY FEATURES & BENEFITS

Designed for early learners (Ages 4+, Grades: PK-2)

Use Sphero Edu Jr's all new block programming to understand the basics of coding and learn computer science principles.

- Sends the program directly to indi™, so you don't have to worry about disconnections while running your program or solving mazes.
- Reprogram how indi™ responds to different colors by choosing from a variety of movements, lights, and sounds that appear when you navigate over the associated color tile:
 - Control indi's movements with different program directions and animated movements like a celebration dance.
 - Control indi's lights and choose between solid colors and different light patterns on the top LED.
 - Control the sounds and songs that indi™ plays.
- Send a custom program to indi™ and have your students try to figure out what was sent.
- In addition to programming indi™, Sphero Edu Jr allows you to drive indi™ with intuitive controls.
