

airfly drive

Wired CarPlay™ and Android Auto™ go wireless. AirFly Drive's seamless experience is fast and cord-free so you can stay connected to your car without ever plugging in your phone.

AirFly Drive is a compact wireless adapter that transforms wired CarPlay™ or Android Auto™ into a completely cable-free experience. Access maps, music, calls, messages, and voice control in your vehicle without plugging in your phone. Once paired, it remembers your device and reconnects automatically every time you start the car, so your favorite apps and playlists are ready as soon as you begin your drive.

Designed for broad compatibility, it works with most vehicles that have factory wired CarPlay™ or Android Auto™ and includes support for USB-A and USB-C connections via provided USB-C adapter. AirFly Drive delivers stable performance, keeping navigation and audio smooth while you stay focused on the road. The premium design includes a simple front mounted toggle, that enables effortless switching between two connected smartphones in a single press.

airfly drive
