

Typhur Sync Air Fryer

The Air Fryer That Knows When Food Is Done

A built-in wireless probe monitors the food's internal temperature and stops cooking automatically at your selected donness.

5-Point Wireless Temperature Sensing

Measure temperature from multiple points for more accurate and consistent results, with accuracy up to ±0.3°C.

Choose Your Perfect Doneness

Select your preferred doneness in the Typhur App and enjoy juicy chicken, tender steak, and perfectly cooked meals every time.

Smart Whole Chicken Mode

Three-stage cooking—slow roasting, high-heat browning, and resting—helps deliver tender meat with crispy skin.

Adjustable Airflow for Better Texture

Choose Low, Medium, or High fan speed in the app to control crispness and cooking results.

Wireless Probe.
