

Typhur

Ten Times Better than Bluetooth

Sync Gold Quad Wireless Thermometer

Unmatched range and stability, Sync Gold delivers up to 900 meters in open spaces and 200 meters in enclosed spaces with a rock-solid connection.

No More Dropped Connections

Typhur has conquered the most frustrating challenge of wireless thermometers by pioneering Sub-1GHz technology for the most reliable connection.

The Smart Base Does it All

Our innovative Smart Base charges the probes, acts as a WiFi bridge and allows you to control and monitor your cooks without being tethered to your phone.

Dare to Compare

Packed with cutting-edge features that outshine the competition. Using patented technology that provides the most stable connections, the Sync offers the precision and stability that others can't match.

We Don't Just Claim Accuracy, We Back it Up

With two ultra-thin probes and six optimally positioned sensors for higher accuracy. Every Sync is verified accurate by NIST to $\pm 0.3^{\circ}\text{C}$ ($\pm 0.5^{\circ}\text{F}$). A calibration certificate is included with every Sync, guaranteeing accuracy for a lifetime.

Wireless Thermometers Just Got Smarter

Connection up to 900 meters

Heat resistant up to 550°C

Probes are waterproof to IPX8

Unlimited distance when using the app

Predictive algorithm knows when
your food will be done

Durable ceramic, T-shaped handles
